Good morning,

I regret to inform you that our positives have drastically increased over night. At this time, GL has 37 positive cases. This is up 12 from yesterday's update.

The numbers for our K-8 students have not changed since last night's email.

We wish all of our students a speedy recovery.

As a reminder, Governor Livingston has students who live in either Berkeley Heights or Mountainside, thus there may be a difference between the BH totals that our mayor reports and District totals. The district also receives information directly from parents, thus allowing us to more swiftly begin contacting staff and parents and it allows our updates to typically be more up to date. As soon as we are notified of positive cases by parents, we immediately notify the Department of Health and they begin contact tracing.

Sincerely,

Dr. Melissa Varley
