Which Calculator Do I Buy?

Every student should have a calculator. The prices shown are estimates

A **four function calculator (\$1.00)** would get a student through sixth grade math.

A **scientific calculator (\$10.00)** is the standard for grade 7 and 8 (depending on the course). It also will give a sixth grader some additional “math power” but not required for sixth grade. [Recommended Calculator for 7th grade](#)

A **TI-84 Graphing Calculator (\$95)** is required for students entering Algebra and Geometry. This calculator will last your child through high school and into college. Graphing calculators are not “taught” until Algebra and are not allowed in sixth grade math.
